

AITOR GALLARDO MUÑOZ

Senior Software Engineer · Full Stack · AI Engineering · Native iOS & macOS

aitorgamu@gmail.com | +61 0425 446 843 | Brisbane, QLD | Portfolio: [gmsudo.com](#) | GitHub: [github.com/AitorGallardo](#) | XSaved: [xsaved.com](#)

PROFILE

Software engineer with 8+ years shipping products end to end: design, frontend, backend, and the AI in between. TypeScript is my centre of gravity across React/Next.js, Angular and Vue, with Node.js services behind them, and a cross-platform range that includes native iOS and macOS apps in Swift/SwiftUI. Applied AI is a core part of my work (RAG, semantic and hybrid search, MCP tooling, eval harnesses), and I run agentic development workflows every day with Codex and Claude Code. I designed and shipped XSaved solo, end to end: full ownership and a high bar for the user experience.

CORE SKILLS

- Frontend:** TypeScript, React, Next.js, Angular, Vue 3, RxJS/NgRx, Nx monorepo, Tailwind, Three.js/WebGL, Chrome extensions (MV3), accessibility, performance optimisation
- Backend:** Node.js, REST and GraphQL APIs, real-time data sync, local-first architecture, AWS, Docker, CI/CD (GitHub Actions, GitLab)
- Mobile / native:** Swift, SwiftUI, native iPhone and Mac apps sharing one sync layer with the web client
- AI engineering:** RAG, semantic and hybrid keyword/vector retrieval, MCP servers, Claude API, on-device models (transformers.js, Apple on-device AI), evaluation harnesses; agentic workflows with Codex and Claude Code
- Quality:** Jest, Cypress, Jasmine (Playwright/Vitest-ready), Sentry, JIRA, code review culture

FLAGSHIP PROJECT: XSAVED (XSAVED.COM)

- Designed and shipped a cross-platform product solo: a bookmark manager for X with a React/TypeScript Chrome extension live on the Chrome Web Store with 1,000+ installs and a growing base of paying subscribers, native iPhone and Mac apps in Swift/SwiftUI, and the local-first sync spine behind them. Full ownership across product, design, frontend, native, backend and release.
- Built a production AI search engine: semantic and hybrid keyword/vector retrieval with RAG, kept honest by a dedicated evaluation harness (xsaved-rag).
 - Published an MCP server exposing the bookmark library as tools for Claude and other agents (xsaved-mcp), plus a semantic tagging CLI built on the Claude API (xsaved-topics).

PROFESSIONAL EXPERIENCE

- Full-Stack Engineer** · Apartool Aug 2023 – Present · Remote
- Own front-end architecture and standards in Angular + TypeScript for a corporate housing platform, shipping features end to end against REST services.
 - Built advanced catalog search/filtering and an interactive map-based discovery UI, tuned for rendering performance.
 - Implemented real-time data synchronisation with RxJS/NgRx across the app.
 - Designed and shipped an AI-powered communication feature (mood detection, message summarisation) using LLM services.
- Product Engineer** · Freelance Jan 2023 – Aug 2023 · Independent
- Delivered end-to-end digital solutions for small businesses (web apps, landing pages, a restaurant management solution), owning each from design to deployment.
- Software Engineer** · 2Shapes Technologies SLU Dec 2017 – Dec 2022 · Barcelona
- Core engineer for 5 years on a long-lived SaaS platform for the jewelry industry (real-time ordering and inventory), used internationally.
 - Architected a flexible e-commerce builder with interchangeable components and a shared, well-typed component library.
 - Integrated 3D CAD modelling (BabylonJS/WebGL) into the UI: demanding, performance-critical frontend work.
 - Worked in an Nx monorepo with CI/CD pipelines, testing and code review standards.

SELECTED LAB WORK (GMSUDO.COM)

- TabKnight:** keyboard-first Chrome tab manager, a ⌘K command palette with fuzzy search and live previews, local-first. [tabknight.gmsudo.com](#)
- Primordia:** in-browser artificial-life simulation whose organisms think with an open-source 135M model via transformers.js (WebGPU), no server. [primordia.gmsudo.com](#)
- Typefall:** monkeytype-style typing test rendered as a 3D survival crawl (Three.js, cannon-es). [typefall.gmsudo.com](#)

EDUCATION

Higher Degree in Multiplatform Application Development · TecnoCampus Mataró (Universitat Pompeu Fabra), Barcelona · 2017 – 2019 · 2-year programme + 1000-hour industry practicum

Availability: Immediate.
