

AITOR GALLARDO MUÑOZ

SENIOR FRONTEND ENGINEER | REACT, ANGULAR & TYPESCRIPT

Brisbane, Australia | +61 425 446 843 | aitorgamu@gmail.com
xsaved.com | gmsudo.com | github.com/AitorGallardo

PROFILE

Senior frontend engineer with eight years building customer-facing products with React, Angular and TypeScript. Combines commercial SaaS delivery and BabylonJS/WebGL integration with independent ownership of XSaved across web, native Apple apps and backend services. Takes features from interface and application-state design through API integration, testing, release and support. Uses Codex and Claude Code in agentic development workflows, with implementation review and automated checks.

PROJECT: XSAVED

Solo Product Engineer | xsaved.com 2024 - Present

- Independently design, build and maintain a live React/TypeScript Chrome extension with 400+ users, owning product decisions, interface development, integrations, releases and support.
- Build search, filtering and editing workflows for bookmarks, folders, tags and notes, querying the library locally with IndexedDB so the main search path does not depend on a network request.
- Implement passkey authentication and cross-device library sync, retaining queued edits when delivery fails and keeping synchronisation separate from local search.
- Develop native iPhone and Mac apps in beta with Swift/SwiftUI, plus local and cloud AI features including semantic/hybrid search across the product.

PROFESSIONAL EXPERIENCE

Senior Software Developer | Apartool Aug 2023 - Present

- Led Angular/TypeScript feature delivery in an Nx monorepo for a customer-facing accommodation platform, integrating frontend workflows with REST services.
- Built search, filtering and map-based discovery flows with NgRx/RxJS state management and automated tests to support ongoing feature development.
- Developed AI-assisted communication features for mood detection and message summarisation.

Independent Product Developer | Freelance Jan 2023 - Mar 2023

- Delivered a Gatsby (React) restaurant website and QR-accessible menu from brief to launch.

Front End Developer | 2Shapes Technologies SLU Dec 2017 - Dec 2022

- Built and maintained Angular/TypeScript SaaS features for jewellery ordering, inventory and e-commerce over five years of product development.
- Created reusable UI and page-builder components for configurable e-commerce experiences.
- Integrated BabylonJS/WebGL 3D product experiences into the application, connecting interactive product visualisation with commercial frontend workflows.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Angular, Next.js, Redux, NgRx, RxJS
Interactive web: BabylonJS, WebGL, Three.js, reusable UI components
Testing and delivery: Git, Jest, Jasmine, Cypress, Nx, GitHub Actions, GitLab CI/CD, Sentry
Backend and native: Node.js, REST APIs, AWS, PostgreSQL, IndexedDB, Swift/SwiftUI
Applied AI: Semantic/hybrid search, Claude/OpenAI APIs, RAG/MCP prototypes, Codex, Claude Code

EDUCATION AND SPEAKING

Higher National Certificate in Multiplatform Application Development
Escola Pia Santa Anna Mataró, 2017 - 2019

Selected speaker, GDG DevFest Brisbane 2026 | 17 October 2026
Make Large Libraries Feel Small: IndexedDB in a Real Chrome Extension
English fluent; Spanish and Catalan native. Availability: Immediate.
